Why Flip the Classroom?

With so many teachers embracing the potential of digital tools in the classroom, allowing teachers to present their face to face teaching material through an online medium is something ClickView has always fully supported.

There have been numerous examples from around the world that have shown the many benefits of offering lessons flexibly, whether it is for homework, lesson preparation, or simply because students aren’t able to come into class.

ClickView works closely with flipped educators to ensure we deliver a product that meets their actual needs and serves to enhance the process of flipping the classroom. We provide teachers with a safe, reliable and educationally focused video platform that aims to meet their every video-based teaching requirement. On top of all this, ClickView offers innovative interactive video learning that makes learning an active experience and provides teachers with a method of formative assessment.

There are so many teachers who go above and beyond to help their students get the most they can from their learning, it’s our priority to help teachers to do this effectively, and where teachers wish to, be able to share their content not only with their class, but with other teachers and students throughout the country. For that reason, our flipped learning component of our platform is available publicly, so that other teachers and students can access the content immediately and at no cost.

We’d love for you to join the 60+ teachers already sharing their rich video learning content, helping to make education better and more accessible for everyone.

Thank you for your consideration.

Why ClickView?

The Best Collection of Educational Videos

ClickView offers a collection of educational content that is tailored to schools like no other:

1. Our own exclusive productions, created in our own studios;
2. The multitude of relevant television broadcasts airing everyday, with in-house curators to alert schools of relevant upcoming shows;
3. The growing collection of teachers who have shared their own created content;
4. Our acquisitions department that license the very best educational videos from around the world on behalf of schools.

Reliable and Safe

ClickView prioritises student safety with the use of ratings, classifications, different user types and human moderation of user-contributed content. Unlike the case with other video platforms, ClickView's content is never at risk of being removed and is completely free of advertising. ClickView also removes the adverts from any broadcast programme. Schools can have complete faith that ClickView's content is safe for use in the classroom and that anything not appropriate for all ages will be clearly marked and only made available to the relevant people.

More than Video

Video is a universally applied means of helping people to gain a deeper understanding of a topic. ClickView has taken this up a notch with its introduction of interactivity that is now available to any video on the platform. Active learning experiences are achieved through the use of annotations, short answer questions and multiple choice responses.

Accessible

ClickView allows staff to deliver resources to their students in an adaptable and efficient manner. Teachers can create and share video across all platforms, from the interactive white board to laptops and iPads, in class or at home, and through their preferred learning management system. ClickView caters to the accessibility needs of young learners and makes SSO available to students for a more personalised experience. ClickView also makes it possible to reduce bandwidth use in the school through its utilisation of onsite local storage, providing a seamless streaming experience regardless of whether they are a city or regional school.
Featured Channels

ClickView’s Exchange is a space that allows schools around the country to upload and share their video lessons. With the ‘featured channels’ section being the heart of the flipped learning community on ClickView.

Each educator then has their own channel, here teachers can upload their content and organise it into useful playlists. The channels have customisable profile pictures, short biographies and also links to personal website and social media, with sharing options.
Any video on the ClickView platform can be made into an Interactive video. This ensures that an active learning experience takes place for the students and that teachers can monitor their students’ progress.

ClickView is a community of hundreds of thousands of educators, and a growing number or them are embracing the flipped classroom movement.
